The Quantum Program is an enriched bilingual program that integrates technology into the classroom and beyond through the use of individual iPads.

Lindsay Place aims to develop digital citizens while maintaining our tradition of academic excellence.

Technology

Using the iPad as a teaching and learning tool, we aim to prepare our students for the ever changing technological world.

We aim to teach our students to be responsible digital citizens.

The iPads will be purchased on a three year payment plan and will continue to be used throughout their high school career.

“Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is most important.” - Bill Gates

Academics

The Quantum program is for students with a good work ethic who are seeking an academic challenge.

The Quantum approach emphasizes innovative integration of the curriculum through cross curricular instruction, projects and evaluation.

Students will produce, share and present their work using their iPad both in the classroom and at home.

Students must maintain a high level of academic performance to remain in the program.

Key Features of our Enriched Program
